

1. Create a bar chart to visualize the distribution of customer ages. Label the axes and title the chart.
2. Generate a pie chart to represent the distribution of customers by gender.
3. Build a table to show the demographic information for each customer. Label the table elements.
4. Develop a Tableau dashboard combining the bar chart, pie chart, and the table for interactive exploration of customer demographics.

Set 17: Employee Performance Analysis

Dataset: Employee Performance

1. Create a line chart to visualize the performance trend of employees over time. Label the axes and title the chart.
2. Generate a bar chart showing the distribution of employees across different departments. Label the chart elements.
3. Build a table to display the performance data for each employee. Label the table elements.
4. Develop a Tableau dashboard combining the line chart, bar chart, and the table for interactive exploration of employee performance data.

Dataset: Product Inventory

1. Create a bar chart to visualize the quantity of each product in the inventory. Label the axes and title the chart.
2. Generate a stacked bar chart to show the quantity of each product within different product categories.
3. Build a table to show the inventory data for each product. Label the table elements.
4. Develop a Tableau dashboard combining the bar chart, stacked bar chart, and the table for interactive exploration of inventory data.

Set 19: Survey Responses Analysis

Dataset: Survey Responses

1. Create a grouped bar chart to visualize the distribution of answers for Question 1. Label the chart elements.
2. Generate a stacked bar chart to represent the overall distribution of responses for all three questions.
3. Build a table to show the survey response data for each survey. Label the table elements.
4. Develop a Tableau dashboard combining the grouped bar chart, stacked bar chart, and the table for interactive exploration of survey responses.

Set 20: Stock Analysis

Dataset: Stock Prices

1. Create a line chart to visualize the stock prices of three companies (Stock A, Stock B, and Stock

C) over a specific time period. Label the axes and title the chart.

2. Generate a bar chart showing the daily percentage change in stock prices for Stock A. Label the

chart elements.

3. Build a table to display the stock price data for each company over the given period. Label the

table elements.

4. Develop a Tableau dashboard combining the line chart, bar chart, and the table for interactive

exploration of stock prices.
